O-TYPE DESIGN CHART
0.65 - 0.90

12 GORES

Completed by
Name:

O-Series envelopes are constructed from 12 gores. Each gore is built-up from a number of nylon panels which are identified by letters. The row of panels around the base of the balloon, immediately above the fire resistant Nomex mouth, are ' A ' panels. ' $A$ ' is followed by ' $B$ ' with the series continuing upwards. The number of panels varies depending on envelope size, and this can affect the appearance of the colour scheme. The location of the equator also changes, and this can significantly influence the positioning of any artwork.

A parachute top is standard. This is constructed from 12 panels that radiate from a centre patch.

There is no extra charge for changes of fabric colour at any of the lines shown on the chart if the colours are from the standard Cameron range.

| MODEL | O-65 | O-77 | O-90 |
| :---: | :---: | :---: | :---: |
| MAX. PANEL WIDTH | 4.4 | 4.7 | 5.0 |
| PANEL DEPTH | 1.43 | 1.43 | 1.43 |
